

# Being Safe Together

The health of our patients and staff is our main focus.  
We have modified our office to ensure your continued safety.

## Things you will notice we are doing:

- Glass partitions
- Hand sanitizers
- Face masks
- Social distancing
- Health screening
- Temperatures upon entrance
- Flexibility to wait/check-in from the car

## Things you may not notice but are essential to point out:

- A built-in air exchange system in our lobby
- Medical-grade HEPA filter systems in our Operatories and ORs
- Additional protective equipment when doing aerosol procedures
- Hospital-grade products and techniques used to clean surfaces and instruments

## Things we ask of you:

- Bring a face covering to wear when in our building
- Limit the people who come into our lobby with the child
- Be on time – appointments are scheduled to assure social distancing
